Week final: figure guide

Final-T results and prefix diagnostics, including the new complete panel

Section	Pages
Final T: original evaluation	1-6
Figure guide (this page)	7-7
EFP triggers and input strata	8-10
Prefix paraphrases and natural substitutions	11-14
AWL versus non-AWL matched words	15-18
Natural edits on originally correct judgments	19-19
Prefix length and score sensitivity	20-22
Training chain, symmetric edits and answer control	23-26
Same-prefix results across G0, G1, G2 and G3	27-29
Prefix effects on false rejections of correct G3 answers	30-32
Complete C95 panel: wrong advantage and correct benefit	33-35

New C95 panel: ALL four G3 answers per question, including FP and FN.
Six prefixes plus original and neutral control: 3,040 logical scores.
V0 fixed. Both FPR and FNR, continuous scores, and removal tradeoffs.
No new G generation or training; no new T interventions.
